

Roser LED screens

LED Screens – It is important to be able to monitor the progress of a project and to obtain information at different levels and intersections. RoserConSys offers a digital solution by using an optional Wallpaper and 55" LED screens.

In order to provide (turnaround) status to the whole project team wallpaper graphics and KPI dashboards are the best option to use. On these LED screens the real-time data is presented.

55" LED displays can be rented and placed at strategic locations, like main contractor cabins, permit offices, meeting rooms or the coffee corner. The screen is installed in a robust flight case on wheels with an electrical lift system to raise the screen to the preferred height.

Keeping track
of progress
with digital
solutions

Specifications:

- Dimensions flight case: 106.5 (H) x133.5 (W) x 47 (D) cm
- Screen: LED 55"

The following specs should be provided by the client:

- PC with access to client network (ethernet) and Roser Software.
- Connection to the Internet (SaaS).
