

# Roser Touchscreen<sup>®</sup>

## The mobile and flexible way to sign off your project activities

The Roser Touchscreen<sup>®</sup> is a mobile sign off device for activities that call for daily processing by supervisors, contractors, inspectors, production personnel etc. It is used for progress reporting as well as Time In and Out registration (in combination with Time-IT<sup>®</sup>) and direct time booking at work order or activity.

### Some advantages:

- The touchscreen is a mobile device suitable for an industrial environment and to be placed in for instance a site office and workshops.
- Quickly signing off activities during projects or daily maintenance.
- User recognition by means of a barcode card or proximity.
- A by authorization fully-protected user environment for a proper sign off.
- Real-time data processing with the Roser Suite<sup>®</sup>
- Links and interfaces with external software possible.
- Touchscreens are available in various models, for sale or rent.
- The touchscreen has a modern and robust look.
